HISTORY

Quantumcloud is a flourishing IT company that started its journey near the end of year 2002. Today we are comprised of a team of web programmers, designers, content developers, and marketing executives- selectively chosen to lead our clients to their required IT solutions. We seize each new opportunity and leverage it to the enhancement of overall development procedures.

Today our sole focus is on delivering quality web solutions to the clients from Bangladesh and abroad. Over the years we have accumulated a large number of outsourcing clients from USA, UK, Canada, France, South Africa, and Cyprus that turns to Quantumcloud for various web and design and dynamic solutions on a regular basis.

PHILOSOPHY

Quantumcloud started its journey with a sense of challenge to serve the flourishing Information and Communication Technology field of this country. We believe that internet is the future of technology and Quantumcloud desires to usher in each wave of web advancement with a combination of creativity and technological expertise - spanning the spectrum of innovative solutions.

ACTIVITIES

WEB DESIGN

The Internet is rapidly becoming the most popular and effective advertising tool and means to disperse information. And as such, a web site is as indispensable as having business cards and brochures to represent the company effectively.

Quantumcloud's team of design specialist can make a client reach his/her goals by reviewing and analyzing the entire business process from start to finish. After we determine what client's business goals are, we'll work with him/her to develop an appropriate web-based solution that will successfully satisfy all the objectives and more importantly remain within the company's budget.

We are proud to offer vibrant animation with our all inclusive flash website designs. Whatever genre of business a company is in, we will construct an eye catching, professional website creation that will haul in mind-blowing traffic volume and loads of repeat visitation. Client's web site will immediately place him/her at the forefront of the industry as s/he stands towering above his/her competition.

We provide Original and Customized web site design using Macromedia Flash, professional looking graphics, and Cascading style sheets, Web site promotion service, Domain registration, and Web site hosting. All our web sites are designed with usability, user experience, and viewer impression in mind.

Client may already have a web site that is not performing as s/he originally intended, or may be experiencing problems. Whether they are design related problems or traffic we can help him or her.

If client already has a web site and wants someone else to maintain and update the site on a regular basis, we can help him/her. We can also help prepare raw contents for the web and internet.

Online marketing via Search engine optimization (SEO) is the key to accomplishing client's goals on the internet. It is not enough to have a great Web site that impresses one's friends and family. A Web site is not really earning its keep until it gets out there and finds its own traffic. 80% of all web traffics come from search engines. We use professional techniques to optimize client's web sites for search engines such as Google. We provide: Custom Search Engine Optimization, Key-phrase Campaign, Search Engine Visibility Tune-Up, and Link building campaign help.

WEB APPLICATION DEVELOPMENT

When a business outgrows the functionalities that a simple static web site can offer, one needs to implement a more complex dynamic web site that is capable to interact with the users or viewers.

One might need a simple online store, brochure, or a secure shopping cart system with SSL (Secure Socket Layer) technology, password protected areas and advanced search facilities. Quantumcloud can build such a web site. With our level of experience and expertise one can rest assured that the users are getting what they are looking for and the site owner is getting what s/he is aiming for.

Today all kind of businesses are moving more and more of their basic internal and external business operations onto the internet. Because it allows them to automate their unique processes that have been developed and grown accustomed to while reaching a greater audience. You can take advantages of this opportunity too with our help. We will develop the custom web application for your business that will allow you to manage business from anywhere in the world, communicate with clients, access a history of information shared, milestones reached, invoices outstanding, communications sent and received; even internal correspondence can be monitored and managed.

Our expertises encompass:
PHP-MYSQL based dynamic web sites

CORPORATE IDENTITY SOLUTION

Businesses fail by the millions each and every year for one universal reason. They have a clever idea for a business. They take the dive, acquire a loan, spin the 'Closed' sign to 'Open' and they assume that it's only a matter of time until they are inundated with sales. They couldn't be more wrong. The one thing that most new start-ups and small businesses lack is genuine 'identity'. They haven't made an attempt to define their place in the market so there is nothing to push them out in front of their competitors.

If one is getting ready to start a company here is some friendly, objective advice on what he needs to do before open up for business. Ask, "Who am I and what will my company offer that my competitor can't?" also ask the question, "When someone hears the name of my company, what image do I want them to see." Answer these questions and he will begin to establish his/her corporate identity.

Next, take that mentality and apply it to the website, logo, brochures, stationary and any flash presentations he may have done for the company. Now he is ready for business. Quantumcloud makes establishing a corporate identity fast and easy and of course our services cost a mere fraction of what our competitors charge.

Logo Design:

Logos can be a tricky item. Client wants something loud and attractive but not tacky or too flashy. He wants something that gets right to the point and compliments the ideology of your company. A logo is the threshold to a company's identity. At Quantumcloud, we have mastered the art of innovative logo design.

Brochure Design:

Brochure is everything in today's marketplace. In order to excel, a company needs a solid product/line, good customer relations and a way to tie everything together. Our brochures offer a classic, professional

TEMPLATE & OPENSOURCECMSCUSTOMIZATION

Client may already own a web site template and want it to be customized.

We can help.

CMS customization:

Installed some open source CMS system like Joomla, mambo, php/post nuke, xoop, typo3, vbulletin, oscommerce. We can customize and blend it with client's existing web site.

We do:

- Customization of themes and banners
- Customization of texts and images
- Modifications of the source codes and addition of new functions and services to your CMS systems.

Flash template customization:

Change template color scheme

Insert custom images

Change background and texts - Customize navigation menu & buttons

Insert your logo

Insert and create content pages

Modifications of animations

Web site template customization in Photoshop (PSD)/Dreamweaver:

Slice the Photoshop file as required

OPEN SOURCEAPPLICATIONS

Quantumcloud recognizes web as a tool to reach and serve the global population. Besides our commercial ventures, we also distribute open-source php scripts and provide ICT related supports through our own popular web forum.

<http://www.quantumcloud.com>

OUTSOURCING AVENUE

Currently 90% of Quantumcloud's clients are almost exclusively from USA, Canada, UK, Greece, and other European countries. Providing quality web solution has quickly become our primary identity.

Why other companies outsource web solution?

- Better direct resources to improve internal and external service levels
- Improve business results by focusing on your core business
- Accelerate time-to-benefit through streamlined implementation and improved business processes
- Reduce operating costs, including upfront and ongoing capital investments
- Eliminate the need to hire, train, retain, and manage a large IT staff
- Effectively maintain safe and secure technology infrastructures with worry-free support, operations, maintenance, upgrades, and disaster recovery services

What to Outsource?

- Any type of web design and development related work for Internet or Intranet
- User interface design and development
- Graphics, multimedia and Flash related works

Why Quantumcloud as Outsourcing partner?

- Successful project completion record for many Outsourcing projects
- A team of dynamic and enthusiastic developers with history of rapid, flexible response.
- Superior internet knowledge and experience
- Robust infrastructure and proven human communication processes

FUTURE EXPECTATIONS

Internet technology. It is one of the fastest-growing and rapidly changing industries in the world. Quantumcloud desires to usher in each wave of advancement with a combination of creativity and technological expertise - spanning the spectrum of innovative solutions.

How would we do it? By listening to people's needs, and delivering advanced web applications. We want to thrust our company to the forefront of the web and e-business arena.

We also want to grab a fair share of the out sourcing jobs for web solutions from the developed country and thus, bringing in valuable foreign currency for Bangladesh.

Quantumcloud wants to thrive on meeting the challenge of people's and clients' expectations.

Technical expertise and talent are two different issues. Quantumcloud joins the best of the both world. We will guide our clients in their endeavors by providing reliable service - a firm guarantee that one will have everything he needs for the web technology arena.
